DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-19, drawn to a method of making an active optical device, classified in class 438, subclass 15+.
 - II. Claims 20-23, drawn to an active optical device, classified in class 257, subclass 99.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case instead of using the solder alignment technique to attach components to the substrate, you could use a clamping alignment technique to attach components to the substrate.
